

ACTION BASED ACTIVITIES

TOPIC VN3 TILING

THEME: EDUCATION & TRAINING

APPLICATION OF NUMBER

LEVELS 1 & 2

ISSUED SEPTEMBER 2006

INSTRUCTIONS

WHAT DO I DO?

Use this Theme Template to help you:

- plan an Action-based Activity on the theme of Education and Training
- carry out an investigation into the subject
- produce evidence needed for your portfolio

NOTE: Use this booklet WITH your Learner's Planner & Guide.

WHAT IS ASSESSED?

Education and Training is one of six themes you can choose for your Action-based Activity/portfolio work.

APPLICATION OF NUMBER

TOPIC VN3 TILING

TOPIC VN3 TILING

If you are planning to start a project it is vital that you create a plan. This Template will take you step by step from getting started, to writing and checking your final pieces of work. Each step follows Part Two of your *Learner's Planner & Guide*, so read it alongside this Theme Template.

It's a good idea to follow this advice.

You must do this to get the qualification.

**STEP
A**

CHOOSING A TOPIC

One of the best ways to start thinking about a subject is to *mindmap*. You can find how to do this on Page 5 of the *Learner's Planner & Guide*.

TASK 1

Allow about
20 minutes

On your own, or with a colleague, think about and talk about "Tiling" and aspects of it you might like to study.

Work together to make a **mindmap** of the subject. You may want to think about:

- a bathroom
- a kitchen
- flooring
- reading plans
- budgeting
- researching home design
- investigating current trends

PORTFOLIO EVIDENCE – You could copy and add to the unfinished example below. This could then go into your portfolio as evidence that you have thought about your chosen subject.

Continued

TASK 2
Allow about 15 minutes

When you have made your mindmap, focus in on one or two ideas that:

- interest you
- will be easy to research and get information about (talk to your tutor if you are unsure)

Write these ideas down and then try to turn them into **QUESTIONS**. This will help when you write up your conclusions later. The examples in the box may help you do this.

Topic : Tiling	
Original Idea	Question
Kitchen	What tiles do I need? Full wall or section? Size/number of tiles?
Bathroom	What decorative panels are available? Costs?
Types of tiles	Uses and availability? Costs?
Flooring	How much will it cost to cover the floor with different floor coverings? Time taken to complete job?

TASK 3
Allow about 10 minutes

In your portfolio, write down your chosen title/question.

Check with your tutor that it is okay. Remember, you can always change it later if necessary.

TASK 4
Allow about 30 minutes

PLAN – It's a good idea next to draw up a plan of action. Make a table and on it write down what you intend to do and when you will do it by. Highlight key dates and deadlines (e.g. when you are carrying out a survey or presenting your findings).

CHOOSING & INTERPRETING INFORMATION

Interpreting information from suitable sources is an essential part of the qualification and you must be able to show that you have collected, read and extracted information from **DIFFERENT** sources.

There are lots of ways of finding information on tiling such as:

- books and other resources in the library
- DIY magazines, trade journals and newspapers
- using the Internet
- interviewing people

TASK 5

Allow about
2-3 hours

Look for suitable documents to read. Remember:

- at **both Levels 1 and 2** you must use **TWO** different sources of information
- overall **at Level 1** at least one source must include a table, chart, graph or diagram
- **at Level 2** at least one source must include material containing a chart or a graph

You will need to make careful notes as you work. Put these in your portfolio (see also Pages 8 and 9 in the *Learner's Planner & Guide*)

Topic: "How will I set about costing the tiling of a floor?"

Title of book: "A Building Craft Foundation"

Date: April 2006

Author: Peter Brett

Chapter: 3 Communications

Main points in the chapter:

1. Using scales
2. Reading drawings and site plans

Additional evidence:

Location plans
Range and detail drawings
Price lists and information eg B&Q

ASSESSMENT Your tutor will assess that:

- you have chosen the information you need
- you have obtained the information needed
- you have identified the best methods to get the results you need

Remember to label sources clearly.

CARRY OUT AND CHECK CALCULATIONS

Carrying out and checking calculations is an essential part of the qualification. At each level you are required to carry out calculations to do with:

	Level 1	Level 2
a. amounts/sizes	✓	✓
b. scales/proportion	✓	✓
c. handling statistics	✓	✓
d. using formulae		✓

It may be difficult to cover all the required calculations for this topic (See *Learner's Planner & Guide*, Page 10).

TASK 6

Allow about 1 hour

Carry out calculations. You will need to:

- pick out the data/information you think will be useful
- decide on the calculations you need to find the results you want
- show calculation methods clearly
- check calculations and correct any errors

At Level 2 calculations must involve two or more steps.

Talk this over with your tutor if you are at all unsure. A few ideas are given overleaf.

CARRYING OUT AND CHECKING CALCULATIONS

Examples – Carrying out and checking calculations

At Level 1:

- you must carry out calculations using data from a secondary source such as design books and trade journals containing tables, charts, diagrams or line graphs
- you might use information collected first hand as the basis of calculations (eg measuring, calculating the time taken or the total cost of a project)
 - a. costs, sizes
 - b. calculations for scale drawing, proportion for mixing products
 - c. range or average calculations

At Level 2:

- you must carry out calculations using data from a secondary source such as text books and trade journals containing charts or line graphs
- you might use information collected first hand as the basis of calculations (eg time taken)
- your calculations will be more complex, perhaps comparing two sets of sales data from different suppliers or average costs of jobs by two different contractors
 - a. costs for compound areas
 - b. calculations for scale drawing
 - c. comparison of average costs for different products/suppliers
 - d. formula for areas or percentage discount/percentage mark-up

ASSESSMENT Your tutor will assess:

- how well you carried out your calculations (including your working)
- that you checked your methods
- that you spotted and corrected any errors
- that your results make sense

STEP
D

TASK 7

Allow about
3 hours

INTERPRETING RESULTS & PRESENTING FINDINGS

Having collected, sorted, extracted data and carried out calculations based on them, you are now ready to interpret your findings.

1. Go through all the information you have collected and sort it out carefully. Keep only relevant information and make sure EVERYTHING is properly labelled.
2. Now sift through again and, on notepaper, write down your main findings and conclusions. Remember, your first question (Task 2)? Can you now answer your question?
3. How do the results of your calculations relate to the purpose of the Action-based Activity? (See Learner's Planner and Guide Page 12)
4. Think how you will present your findings.

Remember:

- at Level 1 you have to present your findings in **two** different ways using charts or diagrams
- at Level 2 you need to present your findings in **two** different ways using graphs, charts or diagrams
- comment on your graph, chart or diagram

At this stage you will be required to present your findings to a tutor or supervisor. Before you hand your work in, check that:

- you have covered all requirements intended
- each section has suitable headings/labelling
- diagrams, charts, maps etc are properly labelled
- pages are numbered
- there is a contents page

N.B. There is a checklist on Page 14 of the Learner's Planner and Guide

It is a good idea to produce a draft plan/outline of what you will include in your final presentation. An example is given on the next page.

TASK 8

Allow about
3 hours

STEP
D

INTERPRETING RESULTS & PRESENTING FINDINGS *continued*

EXAMPLE OF A DRAFT PRESENTATION PLAN

Topic: Tiling a floor

1. I will present my work as a **report** (computer typed and to include graphs, tables etc) with the sections below.
2. **Introduction** – I will include what I wanted to find out and why the subject interests me.
3. **Method** – a short section saying how I set about collecting data/information e.g. books and trade journals, survey to collect data/information. Also used the Internet.
4. **Calculations and Interpretation** – I will include how I calculated the measurements of the room and extracted information from the data collected; how I worked out best value for money.
5. **Presentation** – I will use written information and diagrams – mainly graphs, charts and diagrams of tiling patterns.
6. **Appendices** – to include some photocopied data from shops and Internet, which included prices.

I must remember to number pages and add a Contents page.

ASSESSMENT Your tutor will assess your work as follows:

At Level 1 you will be assessed on:

- how you have interpreted the results of calculations
- suitable choice of chart or diagram with appropriate labels and correct use of units
- how you have explained what the chart or diagrams show

Additionally **at Level 2** you will be expected to:

- describe the methods you have used
- explain the results of calculations in terms of how they meet the purpose of your chosen Activity

**TILING
MORE ACTION BASED ACTIVITY IDEAS**

1. Design a patterned floor tile covering for a customer. Draw your plans to scale and cost the design.
2. Compare tile prices in different countries (an additional activity may be needed).
3. Carry out a survey to find out about people's DIY interests. Find out how many people have undertaken DIY home improvements in the past year, and what they spent on it (an additional activity may be needed).
4. Compare the cost of different tiles. Cost each type of material and compare prices (an additional activity may be needed).
5. Investigate the rates charged by tilers in your area and put together a business plan to become self-employed (an additional activity may be needed).
6. Investigate and compare the costs of different floor coverings for a chosen room.
